Career Objective

A result-oriented and compliance-driven professional with over 4 years of expertise in pharmaceutical Quality Control and advanced documentation. Seeking a challenging role in Quality Assurance (QA) or Clinical Data Management (CDM) leveraging a strong foundation in cGMP regulations, Veeva systems, stability protocol management, and audit readiness, alongside specialized training in clinical data lifecycles and GCP/ICH regulatory guidelines.

Professional Experience

Senior Executive | Anthem Biosciences Ltd., Bangalore

March 2025 – Present

- **Probiotics Analysis & Troubleshooting:** Perform advanced microbiological analysis for probiotic strains; investigate, troubleshoot, and resolve issues related to high-volume probiotic testing and analytical variations.
- **Veeva Documentation System:** Manage lifecycle documentation within the Veeva platform, including drafting, formatting, and route-to-approval workflows.
- **SAP System & Sample Management:** Utilize SAP ERP to log, manage, and monitor detailed information across various vertical samples, ensuring accurate tracking of historical sample data and maintaining end-to-end traceability.
- **SOP & Protocol Creation:** Responsible for authoring and revising Standard Operating Procedures (SOPs) and establishing comprehensive validation protocols for equipment and testing methods.
- **Stability Lifecycle Management:** Manage the end-to-end stability testing process, including stability sample initiation, scheduling and executing precise sample pullouts, authoring specialized testing protocols, and conducting critical reviews of new sample batches required for initiation.
- **Audit Readiness & Compliance:** Actively handle audit preparation workflows and maintain rigorous audit documentation accuracy to ensure seamless compliance with regulatory standards.
- **Training & Analyst Qualification:** Mentor and train new joiners on laboratory rules, safety protocols, and operational workflows; guide them through the structured analyst qualification process to ensure technical competency.

Executive | Anthem Biosciences Ltd., Bangalore

March 2022 – March 2025

- **Microbiological Testing & Analysis:** Conducted Microbiological Limit Tests (MLT) for finished products, in-process samples, and raw materials; performed routine microbiological analysis including Growth Promotion Testing (GPT) and probiotic analysis.
- **Culture & Media Management:** Managed culture suspension, sub-culturing workflows, and master culture stock maintenance; oversaw media preparation, sterilization validation techniques, and the usage and verification of Bioball reference standards.
- **Sampling & Environmental Monitoring:** Executed aseptic sampling methodologies for raw materials and finished products; conducted active, passive, and surface air environmental

monitoring within cleanroom environments.

- **Equipment Calibration & Maintenance:** Executed routine calibration, maintenance, and performance qualification of laboratory equipment.
- **Quality Compliance & Investigations:** Participated in root cause investigations for laboratory deviations and non-conformances while maintaining strict compliance with Current Good Manufacturing Practices (cGMP).

Intern | Advanced Animal Disease Diagnosis and Management Consortium (ADMaC), Guwahati, Assam

June 2021 – August 2021

- Contributed to a research project evaluating the antimicrobial and in vitro anthelmintic activity of *Nyctanthes arbor-tristis* leaf extracts against pathogenic bacteria.

Intern | Guwahati Medical College and Hospital (GMCH), Guwahati, Assam

March 2019 – August 2019

- **Clinical Department Rotation:** Rotated through Microbiology, Biotechnology, and Pathology departments.
- **Sample Collection & Processing:** Tracked, collected, and cataloged clinical specimens using strict labeling protocols; processed specimens maintaining high accuracy and precision; handled blood bank workflows including sample collection, plasma separation, and cryogenic preservation.
- **Laboratory Techniques & Safety:** Prepared smears, performed specific clinical staining techniques, and conducted microscopic evaluations; maintained aseptic zones during biological sample collection to mitigate infection transmission risk.

Educational Qualifications

Degree	Year	University / Board
M.Sc. (Microbiology)	2019 – 2021	The Oxford College Of Science, Bangalore
B.Sc. (Medical Microbiology)	2015 – 2018	Dolphin (PG) Institute Of Biomedical And Natural Sciences, Dehradun
Class XII	2014	Kendriya Vidyalaya, Khanapara, Assam
Class X	2012	Kendriya Vidyalaya, Khanapara, Assam

Certifications

- **Clinical Data Management & Clinical Research** – Bangalore Clinical Research Institute (BCRI) | *Jul 2023 – Aug 2023*
 - Comprehensive training covering Clinical Trials, Good Clinical Practices (GCP), Informed Consent Form (ICF) design, Protocol Development, and IRB/IEC regulations.
 - Domain knowledge in CRF Design, Medical/Clinical Coding, Data Management Plan (DMP) execution, Database Design, Edit Check/Data Validation Specifications, User Acceptance Testing (UAT), Data Cleaning, Third-Party/Laboratory Data Handling, TMF, and Database Lock.
- **Microsoft Excel – Beginner to Advanced** – Udemy | *Aug 2021*
 - Core focus on advanced functions, data sheets, custom templates, sorting lists, and Pivot Tables.
- **Computer Literacy & Basic Computer Skills for Productivity** – Udemy | *Oct 2020*
 - Developed professional skills in systematic file management, browser navigation, and formal email etiquette.

Industrial Training & Workshops

- **Phytocon Workshop on Commercialization of Medicinal Plant Products** – Lovely Professional University, Jalandhar | *Apr 2018*
 - Learned laboratory extraction techniques and commercial trade dynamics.
- **In-Campus Technical Seminar** – IIT Kharagpur, Dept. of Agricultural and Food Engineering | *Jan 2017*
 - Gained insights into Dermatophytes, related fungal diseases, fermentation mechanics, industrial microbiology, and Actinomycetes diagnostic methods.
- **Industrial Demonstration** – Themis Medicare Ltd., Haridwar | *Dec 2016*
 - Observed large-scale pharmaceutical and medicine manufacturing processes.

Co-Curricular Activities

- **Blood Donation Camps:** Assisted multiple blood collection drives at the Indian Military Academy.
- **Student Welfare Volunteering:** Active member of the Dolphin Student Welfare Committee (DSWC), organizing and managing inter-collegiate cultural and sports events.
